- **Captures pollen, dust, mould spores, bacteria and radon daughters.**
- **Filters down to 0.0003 mm – 50 times smaller than a bacterium.**
- **Swedish-made premium filters for long life.**
- **Provides cleaner and healthier air for large spaces.**

Wood's Active ION HEPA filter for the 900 series consists of two high-performance filters, developed for air purifiers such as the GRAN 900. The filters capture 99.98% of all harmful particles, including pollen, dust, mould spores, bacteria and radon daughters. They are manufactured in Sweden using a unique synthetic material with electrically charged fibres, which means that even the smallest particles are trapped. The result is immediately cleaner and healthier air – quietly and energy efficiently.
