

## Wood's Active ION HEPA filter 300-serie

Filter for Wood's air purifiers in the 300 series

- Suitable for Wood's air purifiers in the 300 series (AL 310, AL 310FC and ELFI 300).
- Removes 99.98% of harmful particles in the air.
- Captures pollen, dust, bacteria, mould spores and radon daughters.
- Filters down to 0.0003 mm – 50 times smaller than a bacterium.
- Provides immediately fresher and healthier indoor air.
- Made in Sweden.

Wood's Swedish-made Active ION HEPA filter is a high-performance filter that fits air purifiers in the 300 series. It captures 99.98% of harmful particles, including pollen, dust, mould spores, bacteria and radon daughters. The filter is made with a synthetic media where the fibres are slightly electrically charged, which means that even the smallest particles are trapped. The result is immediately cleaner and healthier indoor air – energy efficient and quiet.
